Key Findings

Customer Segmentation

- Machine learning identified **three distinct customer personas**: Premium Loyal Customers, Regular Customers, and Inactive Customers.
- Regular Customers represent the largest portion of the customer base.

Revenue Insights

- Regular Customers contribute the highest overall customer value.
- Premium Loyal Customers maintain strong spending behavior despite lower purchase frequency.
- Inactive Customers generate the lowest revenue contribution.

Customer Behavior

- Customers purchase an average of **5 products per transaction**.
- Digital payment adoption exceeds **74%**, indicating strong preference for cashless transactions.
- Promotions influence approximately **10%** of purchasing behavior.

Product Preferences

- Product category preferences vary across customer segments.
- Different customer groups exhibit distinct purchasing patterns, enabling targeted marketing opportunities.

Retention & Engagement

- Inactive Customers represent the biggest retention and re-engagement opportunity.
- Repeat purchase behavior is strongest among Regular Customers, indicating higher engagement levels.

Business Recommendations

- Prioritize retention campaigns for Inactive Customers.
- Strengthen loyalty programs for Premium Loyal Customers.
- Expand digital payment incentives to improve customer experience.
- Implement personalized promotions based on customer segments and product preferences.
- Use customer personas to drive targeted marketing and revenue growth strategies.
